ADITYA GOENKA

Software Engineer | Full-Stack Developer
adityagoenka2000@gmail.com | +91 95822 01120 | LinkedIn: Aditya Goenka

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 2+ years of experience building secure, supportable enterprise applications in banking and regulated environments. Strong in Java, Angular, JavaScript, Node.js, Oracle, and PL/SQL, with proven impact in automation, data workflows, CI/CD, incident management, and cross-functional Agile delivery.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C/C++, PL/SQL
Frameworks & Runtime: Angular, Node.js, Selenium
Databases & Data: Oracle, PL/SQL optimization, data pipelines, data mining, workflow automation
Tools & Practices: Git/GitHub, Maven, Jenkins, IntelliJ, IBM RAD, CI/CD, secure coding, Agile/Scrum, production support

EXPERIENCE

Software Developer | HSBC | Aug 2023 - Present

- Build and ship full-stack banking application features using Java, Angular, JavaScript, Oracle, and PL/SQL while aligning with enterprise architecture, security, QA/QC, and release standards.
- Design, test, deploy, and support UI and backend components for high-availability production systems in a regulated financial services environment.
- Automated Selenium regression suites and validation workflows, reducing manual testing effort by 40% and improving confidence for production deployments.
- Optimized complex PL/SQL data workflows and database interactions to improve maintainability, reliability, and performance across business-critical processes.
- Partner with business stakeholders, QA, operations, and distributed engineering teams to refine requirements, review technical designs, and prioritize improvements using production feedback.
- Support incident triage, post-deployment validation, documentation templates, and process improvements that strengthen development and operations practices.

Software Engineering Intern | Stratacent India | Feb 2023 - Jul 2023

- Built Python-based data mining automation pipelines for a merchant banking client, saving 15+ hours per week in manual effort and improving repeatability of data processing tasks.
- Created logic flows, feasibility analysis, validation steps, and process documentation for data-oriented software workflows in collaboration with delivery teams.

PROJECTS

Counselling Appointment Receptionist Chatbot | Full-Stack Web App | May 2026

- Architected and built a responsive appointment intake product using HTML, CSS, JavaScript, and a Node.js backend.
- Implemented guided schedule/modify flows, backend validation, and JSON-backed request storage for a reliable end-to-end client request workflow.

IoT Motor Health Monitoring System | Aug-Dec 2021

- Built a real-time monitoring system for 100+ three-phase induction motors, applying sensor data analysis to reduce unplanned downtime by 25%.

Sudoku Solver | C++ | Nov 2022

- Implemented a backtracking algorithm to solve arbitrary Sudoku boards, demonstrating strong programming fundamentals and problem-solving ability.

EDUCATION

B.E., Thapar University | GPA: 7.43
Senior Secondary, DPS Indirapuram | 93.5%
Class 10, Birla Vidyamandir, Nainital | GPA: 10.0

ACHIEVEMENTS

- 1st Place - HSBC India Hackathon: National-level internal hackathon winner.
- Pat on the Back - HSBC Q1: Recognized for ownership, quality delivery, and team contribution.
